October 2022

## Thoughts from your Legacy Team...

Welcome fall, pumpkin spice and all things spooky!! We are so excited that cooler weather is here. Here are a few reminders and important dates for this month.

- Our annual Trunk or Treat will be back this year!! Mark your calendars for Friday October 28<sup>th</sup> at 6 pm-7 pm. If you want to sign your car up, please see Ms. Jessica, Ms. Kelli or Ms. Bri. We are also taking Candy Donations.
- In order to have time to prepare for Trunk or Treat we will be closing at 5 pm on Friday October 28<sup>th</sup>. Please plan to pick up your kiddos by then so we have time to prep classes and help parents get set up.
- With the temperature changing, we want to encourage everyone to check your change of clothes. Now is the time of year we should switch over to pants and long sleeves instead of shorts and tank tops. Also with the changing temperature, please be sure to send in a jack, even a lightweight one, for outside time.
- This is the time of year for colds, and other illnesses to pop up. Please help us reduce the number of illnesses by keeping your children home when they are sick or not feeling well. Watch for temperatures, coughs and runny noses and also for rashes as this is sometimes how virus show up in kids.
- We wanted to update you all also on a small change in staffing. Ms. Bri, who is one of our private pre-k teachers, has started training to help close up front. She will still be in the classroom during the day but you will see her up front from about 4:30 on to close. She is unable to take anything more than cash payments at this time. Thank you for your support and Congratulations to Ms. Bri for her progression with in the company.
- Ga Pre-K - Fall Break is October 6<sup>th</sup>,7<sup>th</sup>, and 10<sup>th</sup>. Legacy will be open but Ga Pre-K will be closed

## Framework For Their Future®

### October Class Themes of the Month

#### **Dreamers ~ Theme: Snuggle Buggles**

October brings with it fun activities, rhymes, fall fun, and so much more. Our little ones will learn about their five senses while participating in art, songs, and fingerplays. Fall, pumpkins, and sensory experiences round out this exciting time of year for our Dreamers.

#### **Travelers ~ Theme: Happiness Is...**

What does happiness mean to you? Your toddler will experience a variety of things that bring happiness. We will use our communication skills to discuss our feelings and learn that the way you feel is 'okay', whether happy, sad, silly, or even mad.

#### **Adventurers ~ Theme: If You're Happy and You Know It, Clap Your Hands**

Adventurers will continue to strengthen their sense of self by exploration, problem solving situations encountered in play, and distinguishing "me" from others. Additionally, they will enjoy fall rhymes, fingerplays, songs, and so much more. Circle time, focus areas, and small groups round out this fun time of year for our Adventurers.

#### **Discoverers ~ Theme: Smiles, Frowns, Ups and Downs**

The children will explore feelings with a lot of fall and Halloween fun mixed in. Plenty of finger-play activities, rhymes, and songs will meet the needs and abilities of these Discoverers. With new books to read about feelings and seasons, the children will surely enjoy this month and all that it brings.

#### **Voyagers ~ Theme: Making Sense of the Senses**

Our preschoolers will continue to learn about the new season while exploring their five senses. They will collect pictures to illustrate the senses and have opportunities to be successful, feel proud about their accomplishments, and become decision makers and problem solvers. You can't communicate too much, so keep up the fine work at home.

#### **Explorers ~ Theme: Chefs and Cuisine**

Our oldest children will have plenty of opportunities to create and explore during October. Competitions, poetry, and baking fragrant fall recipes bring this month to life. Children will enjoy stamp collecting and artwork, play reenacting, and lots and lots of pumpkin art! Your children will enjoy the upcoming academic calendar year and we will play our role by providing them with the support they need after the traditional school day ends.

## October

### Dreamers

**Math-** This month, children will begin differentiating between big and small. We will also read about counting numbers and begin exposing children to one-to-one correspondence.

**Science-** Dreamers will learn all about their noses this month. We will work on body part recognition and we will explore pumpkins while focusing on our five senses.

**Social Studies-** October's lessons will focus on being gentle with our friends and recognizing when someone is sad.

### Travelers

**Math-** This month, Travelers enhanced math lessons will center around recognizing and differentiating between primary colors, reading books about shapes, and strengthening our shape recognition skills with a focus on squares.

**Science-** Travelers will work on body and sense correlation. We will continue exploring our five senses when we dig into a pumpkin!

**Social Studies-** Jr. Toddlers will learn all about manners and why they are important. They will also be introduced to forms of transportation.

### Adventurers

**Math-** Adventurers will sing songs and read books about counting and shapes. The children will get into the fall mood with a pumpkin counting activity and will learn about squares!

**Science-** This month we will learn about the life cycle of a pumpkin and learn about planting seeds. Continuing our theme of growing things, we will also learn about the parts of a tree and will explore outside to try to recognize the parts on a real tree.

**Social Studies-** Sr. Toddlers will explore feelings and differentiating emotions. We will also focus on the importance of including friends in play.

### Discoverers

**Math-** This month, we will begin to understand basic geometry concepts by discovering what a sphere is and what "round" means. Adventurers will also work on their sorting skills.

**Science-** Discoverers will be encouraged to think and make predictions about how many cups of pumpkin seeds will come from one pumpkin. They will conduct an experiment to determine if the insides of a pumpkin will float or sink as they practice recording data.

**Social Studies-** Students will learn about growing food and how it gets to a grocery store. They will also learn about emotional control and how to calm themselves when frustrated.

### Voyagers

**Math-** Voyagers will work on understanding the basic geometry concepts and how figures are composed of different shapes. They will also work on counting to higher numbers by counting pumpkin seeds straight from a pumpkin.

**Science-** Voyagers will practice recognizing, identifying, and matching body parts to their senses. We will make sensory observations and determine what sense a person is using in real world scenarios. Voyagers will also learn about leaves and what purpose they serve for trees.

**Social Studies-** Voyagers will discuss what makes them frustrated and learn how to manage it appropriately. They will also learn about lakes as a foundation for learning geography.

## Family Time

### Legacy Academy's Enriched Learning Centers

The classroom environment is the children's third teacher after parents and teaching staff. Legacy Academy classrooms are equipped with **enriched learning centers**. You may find yourself asking, "What do these centers provide for my children?" Below is a description of how our learning centers enrich children's development.

**Dramatic Play** centers facilitate creative expression and foster children's imagination. Together, they use teamwork to explore social roles and communication skills, offering children the ability to work through parts of our world that they want to create a deeper understanding of.

**Block** centers create a space for children to explore physics, mathematics and architecture. Children experiment with constructive play and build on their fine and gross motor skills while strengthening hand-eye coordination. Blocks are an introduction to geometry with shapes and spatial relationships.

**Science** centers encourage children to observe, experiment, analyze, and discover within their environments. Materials like magnifying glasses allow children to use their senses to explore, make predictions, and draw conclusions about the world around them.

**Language and Literacy** centers provide a foundation for early reading and writing. Writing centers provide a space to practice handwriting and explore ways writing is used in daily life, like journaling. Writing materials are also available in multiple places in the classroom, inviting children to record their thoughts and observations throughout the day.

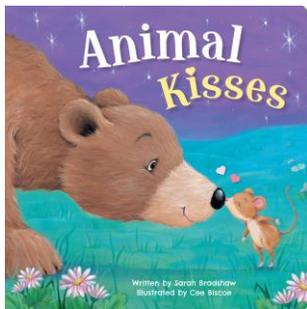

**Manipulative** centers build children's fine motor and problem-solving skills. These centers are heavily focused on children's mathematical skills such as one-to-one correspondence, counting, sorting, classification, patterns, measurement, and seriation.

**Sensory** centers encourage children to manipulate materials and use their senses to explore them. Materials are updated and relate to the current curriculum theme and give children much needed sensory stimulation.

**Art** centers allow for a variety of creative expression outlets. Painting, drawing, and gluing exercises children's creative intuition while strengthening fine motor skills. Legacy Academy emphasizes process art, which allows children to freely express themselves while exploring various art materials and modalities. **Music and dance** materials stimulate a variety of neural pathways and engage not only fine motor skills but gross motor skills as well.

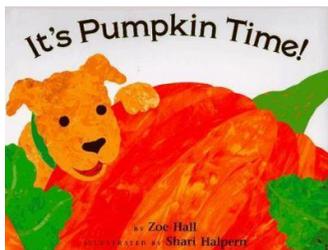

**Social Studies** centers foster cultural awareness in children, encouraging children to learn about similarities and differences between people, places, and environments. Children are also assigned classroom roles and responsibilities to foster a sense of classroom community.

## October Books

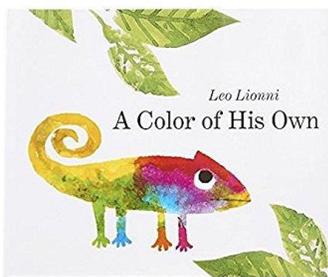

### **Animal Kisses?**

By: Sarah Bradshaw

### **It's Pumpkin Time**

By: Zoe Hall

### **A Color of His Own**

By: Leo Lionni

## Explore Gourds

### Supplies

Various Gourds  
Paint

### Directions

1. **Collect** different color, texture, and shape gourds
2. **Explore!** Encourage children to explore the different types of gourds. They can sort the gourds by different characteristics: bumpy and smooth, yellow and green, size, shape, etc. Encourage them to use various science tools, like magnifying glasses to explore the texture of the gourds in more detail.
3. **Document** the children's observations and explorations of the gourds. Have fun with the ways you document! Have your child write, draw, or paint them!
4. **Cut Open** the gourds with the children and allow them to explore the insides. They can scoop out the seeds, feel the flesh inside, count the seeds, plant them, see if they float or sink, etc. Let your child explore!

You can take this even further by graphing the differences between the different gourds. Example: Do larger gourds have the same number of seeds as the smaller ones?

Ask open ended questions like "What does that feel like?" or "What do you notice about the gourd?" or "What is the difference between these gourds?"
